

Choice is important.

Don't touch anything you haven't chosen yourself.

It's not just any bathroom, it's your bathroom.

You select the tiles that reflect your style.

You refuse to compromise in the selection of the tap for your washbasin. And here you will find just the right actuator plate for the WC to give your bathroom the crowning touch and pamper you with comfort functions. Because Geberit combines visual elegance with innovative functions.

Why not try out your own designs?

We have included actual-size illustrations of various actuator plates in the brochure for you.

Fold back the left-hand side of the brochure, hold the design up to the wall and let your imagination run wild! Use these actual-size samples to select the actuator plate that appeals to you.

Your bathroom, your design.

Select the actuator plate that appeals to you.

Geberit and the Water Efficiency Label 70

Efficiency at a glance.

Make it your own.

Demand uncompromising aesthetics and function.

Geberit ensures unobtrusive yet reliable functions, supreme convenience and durability, all from behind the wall. All that remains visible is the interface with the technology: the actuator plate. The selection of actuator plates is important because you will live with your selection for years. Choose the actuator plate that best suits you and your bathroom from a wide range of options.

New ideas and functions can always be derived from a rectangular shape. This is how Geberit enables you to come up with a contemporary, personalised bathroom design.

Geberit Sigma30. Elegant lines.

- Six colour variants.
- Water-saving dual flush.
- Made of high-quality plastic.
- Also available as an actuator plate for urinals.

The perfect shape: the circle.

Aesthetic curves for a relaxing bathroom experience.

It is impossible to improve on circles; they can only be restaged and rearranged. Geberit actuator plates use new interpretations of round forms to adapt to today's trends. With or without rims. With finely honed edges. Harmoniously adjacent or flowing one into another. And the result is always well rounded.

Geberit Sigma01.

Looks good all the way round.

- Six colour variants.

No-touch flush. Electronic hygiene.

Recent surveys have revealed that fewer and fewer bathroom users are happy to actuate the flushing process manually – instead, they are increasingly looking for sanitary technology that features touchless operation. By offering electronic WC flush actuators using IR sensors, Geberit has a solution to meet this growing demand. And while it requires your toilet to have an electrical connection, this is a feature that is fast becoming the norm anyway.

Geberit Sigma80.

A shining example.

- Two colour variants.
- Water-saving dual flush actuation.
- Touchless flush actuation (see page 62).
- Surface made of high-quality glass.
- Durable LED lighting in five colours.
- Sensor-controlled switch-on function.
- Multiple award-winning design.

A colour scheme to suit your mood

When you approach the toilet, two light bars in five selectable colours display the position of the flush actuations.

Custom-designed. Your bathroom, your design.

Create a bathroom like no other and a design that's entirely yours. Make your bathroom your own with an entirely individual selection of product materials or motifs. You can personalise the surface selections for the Geberit actuator plates Sigma50 and Sigma70. Use surfaces that are perfectly matched to your bathroom or pick out your favourite motif. Your creativity need know no bounds.

→ Individual

Geberit Sigma50 customer-specific. Perfectly matched.

Geberit actuator plate Sigma50
Make your bathroom unique. The surface you love or your favourite motif as an actuator plate with all the advantages that come with the Geberit actuator plate Sigma50.

115.788.00.5

Geberit Sigma70 customer-specific. Select variety.

Geberit actuator plate Sigma70
Play with product materials and designs. As the Geberit actuator plate Sigma70 has no buttons at all, it opens up entirely new possibilities for customised plates.

115.62x.00.1

"x" stands for the option to choose Geberit Sigma concealed cistern 12 cm or 8 cm

Seamless design. Geberit design family.

Toilet and urinal flush control actuation featuring a coordinated design: the result is a single design thread running through the whole bathroom. The flush actuators for urinals, which match the actuator plates for toilets, can either be actuated by hand (pneumatic) or via touchless technology (electronic, by means of infrared detection).

Your style.
The choice is up to you.

Choice is important.

Intelligent functions from Geberit.

If you can start your toilet flush without touching it, if elegant colour effects add atmospheric moments to the time you spend in your bathroom, or if unpleasant smells are efficiently extracted even before anyone notices them, then this means your plumber has installed state-of-the-art Geberit sanitary convenience in your new bathroom. And because durability and reliability are as much a part of Geberit as good design, you will enjoy your selection for years to come.

More convenient by far.

Geberit remote flush actuations.

→ Remote flush actuation

Touched a thousand times.

The pneumatics of the Geberit remote flush actuations type 01 and type 10 have been tested for years of stress. The technology is based on air pressure (not on electrical current).

A touch more refined.

Thanks to the hydraulic servo lifter, just a gentle touch is sufficient for flush actuation with the Geberit remote flush actuation type 70. And no electrical current is required for this.

Quite discreet in fact.

Available as they are in a variety of colours and product materials, the Geberit cover plates open up new design opportunities. A tile-bearing version is available for a particularly discreet appearance.

Regardless of the construction situation, using a remote flush actuation can be the optimal solution. For instance, in order to locate the flush actuation at a different location, if the design for the WC flush control calls for small but elegant, or if using a Geberit Omega concealed cistern with low construction height causes forceful contact between the WC lid and the front actuation. For such cases, Geberit offers various remote flush actuations with pneumatic force transmission, which can be placed anywhere within a 1.70 m radius of the concealed cistern.

Fresh air for everyone.

Odours extracted, air cleaned.

→ Odour extraction

The active carbon filter and insert for in-cistern block are easily accessible via the actuator plate.

The air is cleaned thoroughly in an active carbon filter.

A quiet fan conveys the cleaned air back into the room.

Unpleasant odours are removed right at the source.

92% of people say that smells influence their moods.

That's a good enough reason to make sure that someone using the toilet right after another person doesn't have to draw the short straw. The solution has long been a standard feature above cookers and is now taking hold in toilets too: an effective odour extraction unit. Ultimately, opening windows in winter, burning matches or covering up odours with fragrance sprays just doesn't work – so Geberit DuoFresh takes a different approach by extracting odours right at the source: directly in the WC ceramic appliance. The air is cleaned thoroughly in an active carbon filter. A quiet fan, meanwhile, allows the cleaned air to flow back into the room. The active carbon filter itself indicates when it needs to be replaced – and this is something that can be done easily, with one click that lets you access the area behind the fold-out actuator plate.

Touchless function.
Aesthetically hygienic.

→ Touchless

You're looking for hygiene and freshness without compromise. We offer you flush actuations that fulfil your desire touchlessly. Without pressing a button. Without a touch. And therefore always hygienically.

Touchless actuator plates for WCs and urinals are available in suitably matched designs.

Today's toilets are moving with the times.

Electrical connections now come as standard.

An electrical connection for the toilet is a feature that is included as a matter of course nowadays; after all, you expect your bathroom to reflect your changing needs as well as the lifestyle trends that the future is likely to bring. In Geberit WC installation elements, you'll find everything completely prepared for the future – so it can accommodate any changes you want to make, like retrofitting a Geberit AquaClean shower toilet or installing the coloured LED strips that come with the touchless Geberit actuator plate Sigma80.

- 1 Convenient Geberit AquaClean Sela shower toilet with Geberit Sigma50, white glass.
- 2 Touchless Geberit actuator plate Sigma80, glass reflective.
- 3 DuoFresh odour extraction unit with Geberit actuator plate Sigma40.

Geberit concealed cisterns.

These days, flush technology can be hidden behind the wall – a solution that is more hygienic, safer and offers unbeatable stability. Geberit installation systems make all this possible – including odour extraction directly in the WC ceramic appliance.

- 1 Integrated conduit pipes for the hidden water supply connection of a Geberit AquaClean shower toilet. Also ideally suited for retrofitting.
- 2 Branch fitting for Geberit DuoFresh odour extraction unit.
- 3 Modern flush valve for a water-saving dual flush.
- 4 Practical insert for in-cistern block.
- 5 Item prepared for an electrical connection.

For any application.

Geberit cisterns Sigma and Omega.

So that everything matches: used in combination with the matching concealed cistern, Geberit actuator plates in the Sigma range cover a wide variety of applications and comfort functions. The Geberit flushing system Omega offers great flexibility and particularly small actuator plates. Both flushing systems offer tool-free final installation and guaranteed spare parts availability for 25 years.

You therefore have a wide selection of both Geberit actuator plates and reliable Geberit installation elements for installation behind the wall. And Geberit actuator plates bear the name of the suitable cistern so that you can be certain that everything will match.

Geberit Sigma concealed cistern

- Construction height 112 cm
- Front actuation
- Barrier-free and height-adjustable models available
- Also available as a corner element
- Odour extraction (recirculating air / exhaust air)
- Suitable for Geberit remote flush actuation

WELL – Quality mark for resource conservation.

Recognise efficiency at a glance.

What has long been the standard for household appliances has now become the standard in sanitary technology: the new WELL Water Efficiency Label makes it easier for you to select more efficient, water-saving taps and sanitary equipment. Now you can tell at a glance which products live up to today's standards for conserving our valuable water resources. The marking on the labels is based on the familiar EU energy labels for household appliances. Several Geberit products have already been classified with the Water Efficiency Label. Products designed for private users are expected to offer additional benefits by both providing comfort functions and making water available for wellness applications in the home. This label is a response to the growing environmental awareness of consumers and will make it much easier to quickly choose the right products for your own needs in the future.
