## **A new perspective.**

Traditionally, a bathroom had to be functional and easy to clean. The same is true today – although now it has to fulfill even more requirements. In addition to functionality, design and individuality have found their way into the modern bathroom. Open spaces and clean lines prevail, and even the tiniest details match the interior concept.

Open up your showering area and add a touch of elegance with Geberit shower drains. They meet the highest demands in terms of style, handling and hygiene.

# Geberit's innovative shower drains.

Form combined with function.

## Shower channel 8

The Geberit CleanLine shower channel is an elegant way to create a clean, open space.

## Wall drain 6

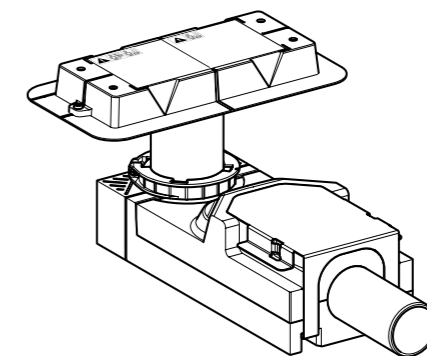

Almost invisible: The wall drain from Geberit opens a new range of possibilities for pure floor-even showering.

## Floor drain 10

Geberit floor drains offer compelling design and proven functionality.

## Technical details 12

A multitude of advantages and the most important technical specifications to determine the appropriate solution for every shower.

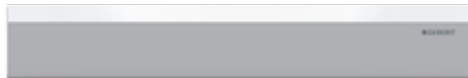

# As unique as your bathroom. The Geberit wall drain.

When planning the bathroom a lot of time is invested in the question of how to cover the surfaces, be it the floor or the wall. Colours and materials are compared and discussed, and when finally a solution is found you do not want anything to disturb the picture. The Geberit wall drain is not only a stylish solution to remove the shower drain from the floor, but also a clever way to make it absolutely invisible. It can be tiled according to your preference and matches every conceivable surrounding. If you opt for contrast instead, accentuate your wall drain with one of Geberit's award-winning covers.

An elegant cover or customized with tiles? You decide on the look of your wall drain.

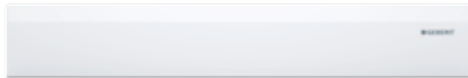

## Colours and materials

Bright chrome-plated

Stainless steel brushed

White

Also available for tiles according to preference (page 7)

The covers received the "iF product design award 2014", which has been a recognized symbol of good design for more than 50 years.

## Even simpler cleaning.

Beside its good looks the wall drain also offers practical advantages. The hair trap can be easily removed, this makes cleaning quick and easy.

Installing an optional collector profile directly in front of the wall drain allows dirt and deposits to collect somewhere that is easy to access, so they can simply be wiped away.

Customize your drain and enjoy floor-even showering in its purest form.

# Pure elegance. The Geberit CleanLine.

The Geberit CleanLine shower channel gives your bathroom a modern finish. With its reduced and puristic design it adds linearity and calm to the shower area. Moreover, the design is not only brilliant because of its appearance, but also because of its superb design for cleaning. At last you can combine an outstanding look with function and hygiene.

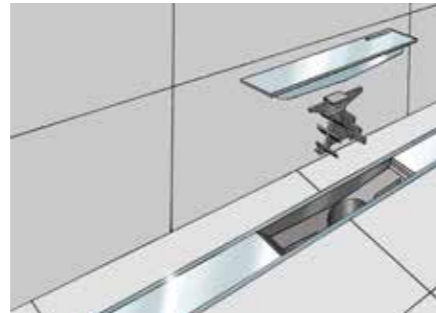

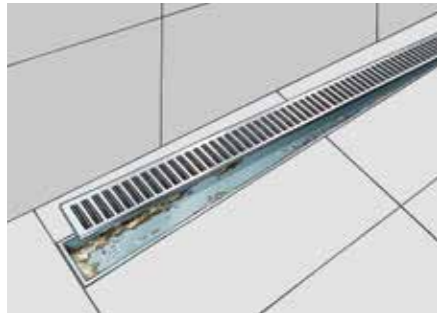

## Well-known problem.

Many shower channels look good, but underneath the cover dirt and bacteria can collect along the entire length. Opening is troublesome and this makes cleaning difficult.

## The Geberit solution.

Geberit CleanLine shower channels not only look good, but are also easy to clean thanks to three clever innovations.

- Open outlet surface: no concealed build-up of deposits
- Handy cover: easy and convenient to open
- Practical comb insert: simply remove and flush out – clean

The comb is particularly easy to clean and effectively holds back hair and dirt.

## Colours and materials

CleanLine60  
metal polished /  
metal brushed

CleanLine60  
dark metal /  
metal brushed

CleanLine60 thin

metal brushed

Geberit CleanLine shower channels take a minimalist design approach to creating a floor-even shower. The channels are made of stainless steel and add an element of style to a modern bathroom.

## A striking detail. The Geberit floor drain.

Small size – big performance. The Geberit floor drain for the shower is the universal solution for floor-even showering with clear advantages: extremely compact solution, reduced design and ingenious function.

The stylish cover is removed in a snap. Under the grating, the integrated comb insert enables quick and easy cleaning.

A standard grating is included with the Geberit floor drain for the shower. Two optional designs are available.

Nothing to trip you up with floor-even solutions. Come on in and enjoy.

### Additional design options

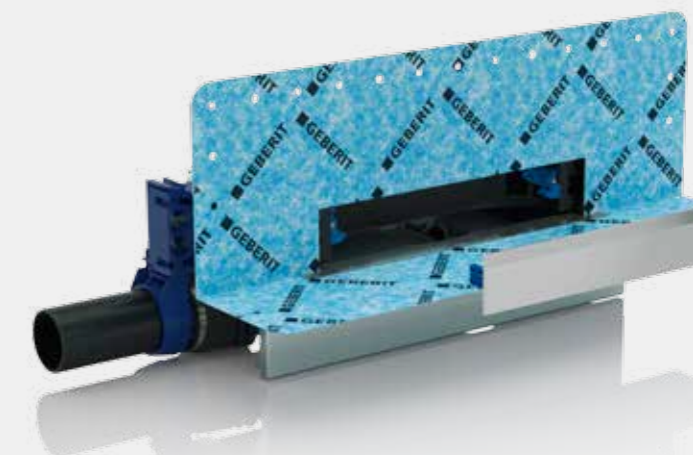

Stainless steel, square

Stainless steel, round

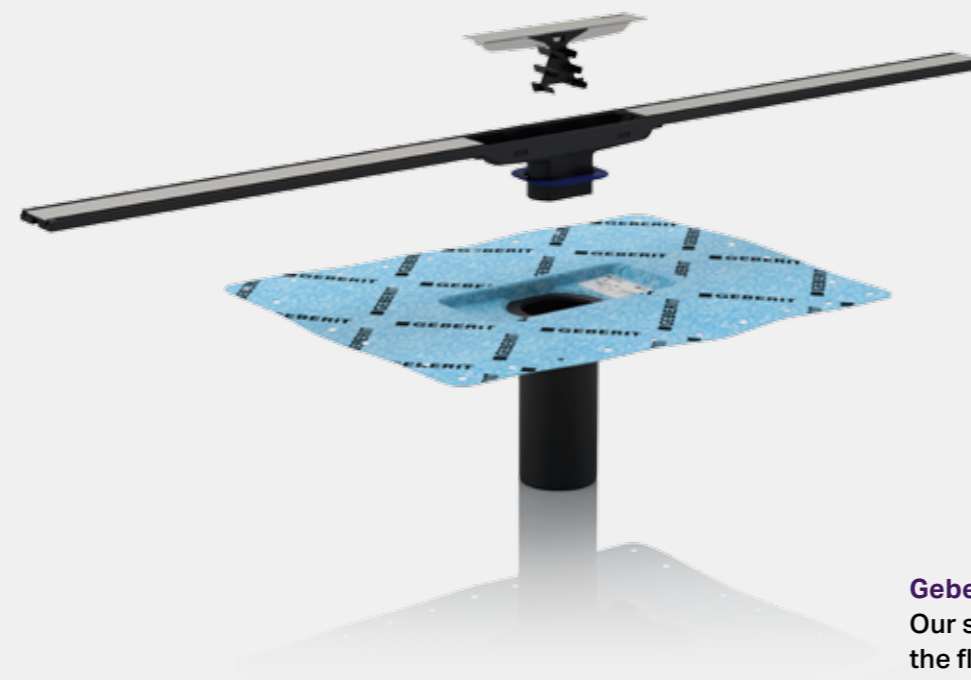

# Three floor-even shower solutions. Countless advantages.

Whether it be wall drains, shower channels or floor drains: the assortment makes it possible to tailor the installation precisely to the building situation and personal preference. The greatest challenge – the sealing – is perfectly prepared because the sealing foil is already injected at the factory, thus making it a permanent component of the product. This saves time, cuts stress during installation, and minimises the risk of leaks. In addition, each drain version offers its own advantages.

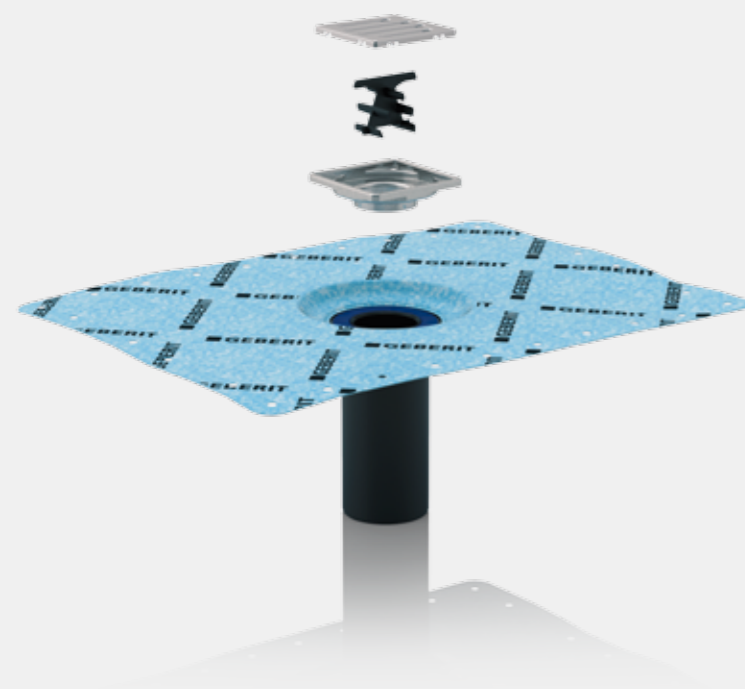

**Geberit wall drain for shower.**  
Our customizable design solution in the wall.

- Continuous floor surface
- Simple cleaning and optimum hygiene
- Can be tiled according to preference

**Geberit CleanLine shower channels.**  
Our solution for elegant designer lines in the floor.
